

Saif Yasser Bayoomi

Software Engineer | Mobile App. Developer (Flutter)

✉ saifyasser386@gmail.com ☎ +201156162380 📍 Cairo, Egypt 🌐 Saif Yasser 🔄 seifyaser

🛡 Military Status: Exempted

PROFILE

- Flutter developer with over 2 years of hands-on experience learning and building cross-platform applications. Skilled in architecting scalable codebases using clean architecture and modern state management, with proven experience integrating RESTful APIs, Firebase services, Google Maps SDK, and payment gateways. Comfortable owning the full app lifecycle — from architecture design through CI/CD automation to publishing on Google Play & App Store.

EDUCATION

Bachelor of Computer Science

08/2022 – 07/2026 | Obour City, Egypt

- Faculty of Computer Science and Artificial Intelligence, Benha National University.

PROFESSIONAL EXPERIENCE

Transport Information Technology (TransIT)

07/2025 – 08/2025 | Nasr City ,Cairo

Flutter Intern 📧

- Developed a BRT (Bus Rapid Transit) application for booking tickets.

VOLUNTEERING

Core Team Member – Google Developer Groups(GDG BNU) 📧

11/2024 – 04/2025

Benha National Univ. Obour City

Flutter Technical/Instructor

- Mentored and guided beginners through their Flutter learning journey.
- Delivered technical sessions and hands-on training on Flutter, Dart, Firebase, and state management.

SKILLS

- Flutter & Dart:** — Flutter SDK, Dart Language | OOP (Object-Oriented Programming) | SOLID Principles | Theming & Custom Widgets | State Management (Cubit)
- API & Backend Integration:** — | RESTful APIs (CRUD Operations) | GraphQL APIs | Dio / HTTP | Firebase (Auth, Firestore, FCM Notifications, Firebase Crashlytics, Firebase Analytics) | Postman / Swagger (API Testing) | Node.js | Express.js | MongoDB
- Mapping & Location Services:** — Google Maps SDK Integration | Real-time Location Tracking | Polyline Routing & Drawing | Custom Marker Icons & Map Styling | Geolocator / Location package & Geocoding
- Local Storage & Others:** — Localization (Multiple Languages Support) | Shared Preferences | Hive
- Payment Integration:** — Stripe | paymob | fawrypay | paypal
- CI/CD & Automation** — GitHub Actions | Codemagic | Appetize
- Deployment & Release Management** — Google Play publishing | Flavors
- Version Control:** — Git | GitHub

PROJECTS

Kemet Vision - AI Travel Guide

Google Play [🔗](#)

AI-powered tourism application that helps users explore Egyptian landmarks through interactive maps and smart exploration tools.

- Applied Clean Architecture, Cubit (BLoC), and GoRouter to build a scalable and maintainable application.
- Integrated Google Maps and real-time geolocation to discover nearby attractions and provide location-based experiences.
- Integrated AI-powered chatbot for intelligent tourist assistance and personalized travel recommendations.
- Implemented authentication with Firebase and Google Sign-In alongside wishlist, search history, and personalized user features.
- Configured Firebase Crashlytics and Analytics for production monitoring and error tracking.

Cinema Immersive [Mobile App/Web Admin Dashboard] [🔗](#)

Full-stack cinema booking platform consisting of a Flutter mobile application and an admin dashboard.

- Implemented an end-to-end booking system featuring movie discovery, trailer viewing, showtime scheduling, real-time seat selection, secure online payments, and digital tickets.
- Integrated Paymob Payment Gateway and Firebase Cloud Messaging (FCM) for secure transactions and real-time booking notifications.
- Designed scalable RESTful APIs using Node.js, Express.js, and MongoDB to manage authentication, movies, bookings, users, and cinema operations.
- Developed administrative tools for managing movies, trailers, casts, cinema halls, seating layouts, schedules, bookings, and users.
- Improved application performance by optimizing widget rendering and reducing unnecessary UI rebuilds.
- Followed Clean Architecture with Cubit to improve code maintainability, scalability, and separation of concerns.
- Architected centralized error handling for network failures with contextual user feedback

AI Food Analyzer [🔗](#)

AI-powered food analysis application with real-time nutritional insights.

- Integrated AI vision APIs to identify food items and estimate calories, fats, carbohydrates, protein, and sugar.
- Implemented a health scoring system to evaluate meals based on nutritional values.
- Enabled users to capture or select food images directly within the application.
- Enabled users to capture or upload food images for instant analysis.
- Built the application using Cubit with a responsive and intuitive user interface.

Live Location Tracker [🔗](#)

Implemented real-time user location tracking using device GPS.

- Developed a real-time GPS tracking application with live user location updates.
- Calculated dynamic distances and generated navigation routes using map polylines.
- Implemented interactive destination selection with live marker movement on the map.
- Customized Google Maps with styled themes and custom markers for an enhanced navigation experience.

NewsRead [🔗](#)

Modern news aggregation platform with real-time updates, theming, and notifications.

- Integrated news APIs to fetch and display articles from multiple sources.
- Integrated push notifications using Firebase Cloud Messaging (FCM) to deliver breaking news in real time.
- Built custom UI components including an interactive bottom navigation bar and reusable news card widgets.
- Built a settings screen allowing users to select preferred country-based news and application language.
- Added customizable theming with full support for light and dark modes.
- Developed article details screen and a discover page with categorized news content.
